

Computing and ICT Skills

St George's Computing and ICT Programme is designed for those students who are interested in developing their knowledge and understanding of computing and ICT.

Accreditation is earned through LASER LEAP Qualification to Level 1 or through LASER Quality Mark to Platinum level.

Students will engage in learning around:

Coding

Animation

Greenscreen media

Photography and manipulating images

3D printing

Creating a website

Using Computer applications

Internet and Online safety

Buying safely online

ICT in the community etc

The programme is designed to give students increased confidence in the use of ICT, including how to stay safe whilst using ICT and online media. This course will also develop their communication and teamwork skills.
